EDUCATION

KAIST, Korea Advanced Institute of Science and Technology

Aug 2020 - Feb 2025 (Expected)

Degree: Bachelor of Science (8th Semester)

Major: Computer Science, Minor: Electrical Engineering

WORK EXPERIENCE

AI Engineer Intern, MolpaxBio

Dec 2023 - Mar 2024

- Collaboratively developed a deep learning pipeline for multi-instance classification using whole slide images for binary-cancer prognosis and multi-staging cancer classification tasks.
- Contributed to a non-alcoholic steatohepatitis (NASH) detection project by identifying cellular components in liver tissue slides and assessing tissue health.
- Developed a fast-patching mechanism with efficient annotation scaling and applied YOLOv8 for segmentation of tall cells in thyroid tissue slides for qualitative analysis by pathologists.

Individual Study, INA Lab

Oct 2023 - Dec 2023

- Developed the pre-processing and post-processing code for the paper 'AutoAD: Movie Description in Context'.
- Integrated the code with the model provided in the paper to dynamically create audio descriptions.

PROJECTS

[Progressive Self-Knowledge Distillation with Mutual Learning](#)

Spring '23

Improved image classification on CIFAR-100 by integrating self-knowledge distillation with collaborative learning, achieving higher accuracy at reduced computational expense.

[DINO-Matching 3D Gaussian Splatting \(Paper\)](#)

Fall '23

Qualitatively improved small object rendering and reduced artifacts by emphasizing scene reconstruction and viewpoint consistency in DINO-feature space.

[OECT: Optimized-Embedded Cluster & Tune \(Paper\)](#)

Fall '23

Enhanced LLM performance in classification tasks using an embedding-clustering algorithm, achieving 2.6% and 4% increases in accuracy on topical and non-topical datasets respectively.

SKILLS

Python, PyTorch, Apache Spark, MySQL, C, Java, Figma

COURSEWORK

CS570 Artificial Intelligence and Machine Learning — CS576 Computer Vision — CS470 Introduction to Artificial Intelligence — CS361 Introduction to Data Science — CS479 Machine Learning for 3D data — CS475 Machine Learning for Natural Language Processing
